## Impact of CBISA

Impact of treatment services is measured by surveying client perception of the quality of services received including the following: general satisfaction with services, access to services, quality and appropriateness of services, outcome of services, and participation in treatment planning. Additionally, impacts are measured by improvements in social connectedness and overall functioning. Impact of treatment services is relevant because clients who feel empowered, motivated, have positive family relationships, and feel they have the ability to change may be more likely to have positive treatment outcomes.

The following information represents data from those clients who agreed or strongly agreed at the time of successful discharge.
